

COMIC CRAFT

Brainstorming & Ideation Phase

The Brainstorming and Ideation Phase is the first step in the Comic Craft project. In this phase, the team generates creative ideas for the comic story, characters, setting and theme. Different story concepts are discussed and compared, and the most interesting idea is selected for development. The team may use mind maps, sketches, sticky notes and group discussions to explore possibilities. This phase helps create a clear and creative foundation for the comic project.
